SCHEDULE 1

ACCEPTABLE USE POLICY

Introduction

Urban Wimax relationships with its clients, other networks, and ultimately its connectivity to the rest of the internet, require its clients to behave responsibly. Accordingly, Urban Wimax cannot permit irresponsible behaviour by its clients, which could damage these relationships, Urban Wimax's network or the use of the internet by others. Compliance with this Acceptable Use Policy is a contractual requirement. If you fail to do so, your service may be suspended or terminated.

Illegal Activities

You must not, by using the service, possess or transmit illegal material. You should be aware that as the internet is a global network, some activities/material which may be legal in the UK, may be illegal elsewhere in the world and vice versa. When you visit a website, a copy of the visited pages is stored on your pc in the web browsers' cache files. Storage of illegal material in this way may well be a criminal offence, as well as contravening this Acceptable Use Policy. If you are in any doubt as to the legality of anything, don't do it and take independent legal advice before proceeding. You must not gain or attempt to gain unauthorised access to any computer systems for any purpose, including accessing the internet. As well as being in breach of your contract for the particular service, such hacking or attempted hacking is a criminal offence.

Forging Addresses

You must not send data via the internet which has forged addresses or which is deliberately constructed to adversely affect remote machines. You must not configure your pc as an open relay system.

Port Scanning

You must not run "port scanning " software which accesses remote machines or networks, except with the explicit prior permission of the administrator or owner of such remote machines or networks. This includes using applications capable of scanning the ports of other internet users. If you intend to run a port scanning application, you must provide Urban Wimax with a copy of the written consent received from the target of the scan authorising the activity. This must be supplied to Urban Wimax prior to the application being run.

Spam or Unsolicited Email

You must not participate in the sending of unsolicited bulk email or any other form of email or Usenet "abuse". This applies to material which originates on your system as well as third party material which passes through your system.

Internet Connection Sharing

If you share the resources of your internet connection over a Private Network on your premises, you must make sure that your network is secure, and that any internet Connection Sharing software that you are using does not permit access from outside of your network. This is especially important if running an "Open Proxy Server". This is because an "Open Proxy Server" will allow other users of the internet to exploit your internet connection, and use it as if it were their own. For example, an external user could access your local network or send unsolicited e-mail(s) that would appear to come from you.

What action will Urban Wimax Take?

Compliance with this Acceptable Use Policy is a contractual requirement. If you fail to do so, your service may be suspended or terminated. Urban Wimax may operate systems to ensure compliance with this AUP, including without limitation port scanning and testing of open servers and mail relays. Clients who engage in abusive behaviour will be notified that their behaviour is unacceptable and may have their accounts suspended or terminated.

Account Restoration

A suspended account may be restored at Urban Wimax's discretion, upon receipt of a written undertaking by the abuser not to commit any future "abuse". All cases are, however, considered by Urban Wimax on their individual merits.
